

Test data

Name	Experience
Trudi Klaassen	She enjoyed the experience, it made her smile. Would not like to do this every meeting, maybe once every two weeks.
Suzanne Lenferink	She really likes it that the <i>robot</i> feels sentient and like a weird companion. She can see the potential of it being used at her meetings at work.
Tatum Xhofleer	<p>She likes the idea, she thinks it is original and it can make you happier because of the cute faces you would see.</p> <p>She thinks if she were to encounter it in real life it would make her smile and it would be what she would find interesting. Also, she will most likely stand there a little longer to see what's what.</p> <p>She thinks it's kind of fun in practice, but she thinks if you do it every time you leave the room and then want to come back that you have to pass it maybe people can see it as annoying. But if you do it once a day then it's fun!</p>
